

The whole funnel, run as one system.

Targeting, campaigns, a dedicated rep team and pipeline recovery, wired together and reporting as one.

WHAT IS INCLUDED

Data and targeting. Verified contacts built for the campaign about to run.

Campaigns on managed domains. Written by people, sent from domains we buy and maintain. Your domain is never involved.

A dedicated rep team. Working the same account set the campaigns work, so an engaged prospect gets a call that references what they engaged with.

Pipeline and CRM work. Recovery on the deals already in your system, and the ongoing audit that keeps reporting honest.

ONE REPORT ACROSS THE WHOLE FUNNEL

Companies found, contacts verified, humans engaged, conversations had, meetings held, deals moved. One set of definitions, no vendor seams. When a stage underperforms, the report shows which one.

PRICING AND TERM

\$1,000 annual payment.

\$2,000 month one: targeting, data build, domain preparation.

\$3,000 month two: campaigns come online as capacity warms.

\$4,000 month three: the rep team fully online against a warm set.

\$5,000 a month from month four, the full run rate.

The initial term is twelve months. The ramp exists because the early months are build months; you are not paying full rate before the full system is running.

WHAT WE DO NOT PROMISE

Pipeline or revenue quotas. The system, the honest count, and the ability to show precisely where any underperformance lives.

HOW IT STARTS

With the free pipeline audit: send us what you run today, keep the findings in writing either way.
