

Outreach that lands, written by people, sent from infrastructure we own.

End to end cold email: the list, the copy, the sending machine and the reporting, run for you.

WHAT YOU GET

A verified list. From our book, or yours through our verification gate first, without exception.

Copy written by people. Approved by you before anything sends.

Managed sending. Fresh domains bought for the engagement, warmed properly. Your own domain never touches cold traffic.

Replies routed. To your team, thread attached, with a monthly report.

WHAT THE REPORT SHOWS

Delivered volume, human-filtered clicks, replies by disposition. Opens appear only as a delivery diagnostic, labeled exactly that. A click counts when a person made it.

THREE PROGRAM STAGES

Crawl. Domains warming, low volume, copy locked, first replies. An honestly priced pilot.

Walk. The fleet warmed, full sequences at standard volume.

Run. Expanded domains, multiple sequences and segments.

Fresh sending domains are included in the program price at every stage.

PRICING

Quoted after the free pipeline audit. The audit is free, the findings are yours in writing either way, and there is a quote at the end with no obligation to take it.

WHAT WE DO NOT PROMISE

Reply quotas, meeting counts, open rates or weekly volume. Ramp is governed by deliverability, which is what protects your reply rate.

HOW IT STARTS

With the free pipeline audit: send us what you run today, keep the findings in writing either way.
